Dear He. Rayner:

Our medical assistant and cosmetician, Rosa Silvestri, attended your camouflage therapy course recently. She had been previously trained as a cosmetician. The training was intense but highly rewarding. Consequently, we have been able to add an excellent alternative to the management of our disfigured patients. It has been my pleasure to assist in several of your courses and I have been **consistently** impressed with the caliber and motivation of your students. As you know, my contributions to your training have been highly interactive, and I have, thus, been able to ascertain that your **students** have had a high level of enthusiasm.

I am certain that the skin care industry will benefit immensely from your forthcoming textbook, and I feel that you can take pride in elevating the standards of your profession.

Sincerely,

Jim Groundwater, M.D.
