Dear Victoria:

Thank you for asking me to review a chapter in your new book. I have just finished the chapter on "**WOMEN IN THE WORK PLACE**". It is fantastic!

You have captured all the elements that a woman needs to survive in the 90s and beyond. I am going to purchase the book to use as a training aid for the 60 % of my membership that are women. This membership that covers U.S. Department of Labor employees in 11 states.

The chapter is informative that it not only points out the problems confronting women in the workplace, but offers the information for solutions. As I stated above, I will probably seek permission to utilize this chapter on its own as a resource package for the women **in our** union.

If the rest of the book is only half as good as this one chapter, **..you** got another winner on your hands. Thank you so much for giving me an opportunity to read an advance copy and offer a critique. The only fault I can find is that I didn't write it. **Every** women in America should buy this book, and working women should have a copy on the bookshelf in the workplace.

Sincerely,

Jim Weyrauch
President
